

The 2021 Canadian Pro Football Season

Many thanks to PLAAY Gamer David Gambrill, Toronto, ON for creating the 2021 Canadian Pro Season for COLD SNAP Canadian Pro Football Game! Last year's Canadian Pro Season was one we hope you'll enjoy re-creating with COLD SNAP.

This year's release once again contains finder columns for determining ball carriers, pass receivers, return men, and for assigning interceptions and sacks. The finders are completely optional, you're welcome to continue to use the game's readings and stamina rules, or your own method. If you choose to use the finders, you'll need the twenty-sided dice included with your copy of COLD SNAP. Simply roll the d20 and look up the result, using that player as the runner, receiver, or return man, or the defender who is credited with the sack or interception.

A couple things about finders. First, they have the potential to create incorrect distributions of results. For example, a player may have returned 10 punts over the course of two games, and then was replaced by a different player as the punt return specialist for the rest of the season. The finder ranges will distribute those 10 returns over the full 14 game schedule, rather than over two games. (We've tried to account for situations like this by alerting you to them with the standard usage symbols. In this case, the player would get an asterisk on his PR grade, even though he only returned 10 punts.) Also, when you use finders, common sense should always rule. For example, if the finder roll gives an important "touch" to a non-descript player, you should feel free to improvise, by either re-rolling, or legislating a different call yourself. I realize, though, that many gamers like to have these choices out of their hands, which is why they use finders in the first place. Bottom line on finders: use, or not use, as YOU see fit!

We've also added the team offence/defence tendency ratings, for use with Giorgio Salvadego's fast-action cards and play-calling chart. The defence tendency rating is listed in [brackets] just before the Team Defence Y rating, on the defence portion of the team sheet. The offence tendency rating is found beneath the "long pass" receiver finder ratings, on the offence half of the team sheet.

Note that this year, David changed the way he dealt with fringe players. "So many stars/starters went down with injuries--but they performed very well during the few games they played. So this year, instead of including a fringe players list with a lot of 0/0 benchwarmers (guys who played, but had no significant stats), I decided to include the injured stars/starters on the team sheets. I put these guys in brown and marked them as 'Fringe' with daggers. The dagger notes will show that if you want to play these guys, you have to make a d6 roll before the game to see whether or not they are ready to go. If you don't make the roll, they don't play."

This is our thirteenth year offering the Canadian pro season in a "print-it-yourself" PDF version, created in team colors. You can fold the visiting team's team sheet in half, and flip it back and forth from offence to defence as the game progresses.

As always, if you have any questions about the game or the 2021 teams, just let us know! We're always happy to help. Again, major thanks to David Gambrill. David has been helping with COLD SNAP since the game was released in 2009 and follows the Canadian pro league avidly. Please let him know you appreciate his work if you run across him on one of the various sports board game forums or pages.

We all hope you enjoy many hours of football fun with these teams!

Keith Avallone
