## Base Starting Lineups, Stadiums & Starting Pitcher Rotations:

Taken as either Opening Day lineup (w/ adjustments for usage stars as necessary) from the midpoint year of range or first non-DH Nippon Series game

Number next to Starting Pitcher in rotation is % of starts compared to #1 pitcher. So, for example, 1 means "should get as many starts as #1 pitcher", 1/2 means "should get half the starts as #1 pitcher". For the league I am doing, I have all the scheduled starts mapped out for the season and non-usage star SP are only going to be used as emergency fill-ins for various injury/unavailability issues. Also note that Endurance ratings for RP/SP are for relief appearances only, should not be used for starts (Full Usage RP/SP appear in rotations below)
