

LULL Statistics Generation Grid for HOCKEY BLAST Pro Hockey Game

By Jule Sigall

I'm new to HOCKEY BLAST, I like to keep stats as I go, so came up with a little add-on I thought I'd share. Every time a LULL is rolled, look at the BLACK die (saves time, no added die rolls!) and consult this table to determine how many shots on goal were taken during the LULL and if any penalties were called...

BLACK DIE	Visitor Shots	Home Shots	Penalty?
1	0	3	YES (Visitor)
2	1	2	NO
3	1	2	NO
4	2	1	NO
5	2	1	NO
6	3	0	YES (Home)

For example, you roll a **BLACK 1** and **WHITE 6** for a 7— a LULL. During that LULL the Visitors get a 2 minute minor (I choose the highest PEN rating on the current line to serve) and the Home team gets 3 shots on goal.

This should produce the same number of shots and penalties as the LULL calculations in the rule book on average. For some reason I like this better than calculating this after the game. I have a new draft scoresheet that incorporates this that I am still testing but will share when it's ready too.

Hope you like this, would love any feedback.
